

Rajd SysTech AB awarded turn-key contract from eminent high profile client in New Zealand

PRESS RELEASE, PITEÅ, MAY 2016

Rajd Systech AB develops, markets and delivers systems for Proving Ground Management globally. Quality Area Management incorporating Security, Safety and Monitoring.

SHPG offers an advanced array of real world winter testing facilities specifically tailored to the development, evaluation and proving of current and future automotive technologies. They are specialists in low friction surfaces and offer winter driving conditions for all stages of automotive product development. SHPG's unique counter-seasonal Southern Hemisphere location helps bridge the winter testing gap between northern winters.

- "The reason why we choose Rajd Systech AB as our partner is – The simplicity of installation and operation, as well as the deep understanding of the product we offer and what our global clients require" – says CEO Tom Elworthy.
