

## Rajd SysTech AB partly aquired by Data Ductus AB to boost Automotive Testing

**PRESS RELEASE, PITEÅ, DECEMBER 2016**

The Swedish Company Rajd Systech AB, recently partly aquired by the Data Ductus Group, is deveoping and marketing turn-key solutions for Proving Ground Safety and Management. The Rajd PGM Solution provides the most cost effective solution available on the market and yet enforces safety, increases density of test vehicles, improves efficiency for operators and allows for efficient planning and allocation of resources.

*- “This acquisition will strenghten our position as a solution provider to the industry. Data Ductus will contribute significantly with technical know-how but also enhance our reach to an international market. Customers can now benefit from and organization that can provide global service and support to our customers from three continents”*

*- says Chairman Per-Åke Hedlund.*

*- “Innovative developments undertaken by the automotive industry will increase the demand for systematic testing and verification in both real and virtual conditions. It is breath-taking to foresee how self-driving vehicles will soon hit public roads but also be servicing highly automated industrial operations such as within mining. Our investment in Rajd Systech AB is strategic and a part of Data Ductus’ ambition to service the digital transformation of industries”*

*- says Urban Lundmark, CEO of Data Ductus Grop*
