

## Rajd SysTech AB respond to increasing and expanding business with strengthening our organization

PRESS RELEASE, PITEÅ, MAY 2023

The Swedish company Rajd SysTech develops and markets turn-key safety solutions for the management of proving grounds, primarily within the automotive industry. The Rajd Proving Ground Management solution (RPGM) offers the most cost-effective and customizable solution on the market while prioritizing safety. It enables increased density of test vehicles, improves operational efficiency, and allows for efficient planning and resource allocation.

In response to the increasing global demand for the RPGM Solution, which incorporates RKT precision and High-Speed Collision Warning, Rajd SysTech AB is reinforcing our organization by welcoming Ms Evelina Eriksson as Product Manager. Evelina brings a background from the Automotive sector and has prior experience in developing optical sensor solutions for various applications. Most recently, she worked as a program manager for LiDAR at Veoneer, where she gained valuable experience in overseeing and driving the development of cutting-edge technologies for the automotive market.

*- “What attracted me to join Rajd, was the interesting products, its potential, and the dynamic nature of a smaller organization. From the moment I joined, I was warmly welcomed by the team, who impress me daily with their competence, drive, and unwavering dedication to customer satisfaction. I’m genuinely excited to be part of this exceptional team and contribute to enhancing our product to meet our customers’ evolving needs, both now and in the future.”*
